

Release Notes

22.10.2012

Bug

- [TDCLIENT-306] - Crash when create a space out of an exiting folder (QFileDialog::getOpenFileName())
- [TDCLIENT-521] - Crash in CMacFileSystemWatcherEngine::initProcessing
- [TDCLIENT-604] - Gui does not show the correct delayed icons, locked files filter does not show all delayed files (sometimes)
- [TDCLIENT-726] - Handle corrupt packages inside the version cache (CArchiveManager::copyFromArchive)
- [TDCLIENT-756] - Handling of missing CreationTimeStamps on Files/Folders
- [TDCLIENT-758] - RenameDialog does not handle trashed files or dirs (CFileNameValidator)
- [TDCLIENT-760] - 1 Pixel of the Message frame stays on the screen in the Recover View
- [TDCLIENT-774] - Rescan failed to solve „dir is currentInFs but does not exist in fs „, caused by mixed case path/ name in db
- [TDCLIENT-789] - Empty Trash/DeleteFileFinally deletes tbl_file/tbl_version entries before completely confirmed from log
- [TDCLIENT-791] - Window of portable version doesn't get activated when starting 2nd instance
- [TDCLIENT-792] - New Versions of files marked as Offline Accessible do not get automatically downloaded
- [TDCLIENT-798] - Wrong Owner of Space and wrong UserRights
- [TDCLIENT-799] - Members List, vertical scroll bar.
- [TDCLIENT-807] - Missing check if user has „modify“ right when forcing paths in db
- [TDCLIENT-809] - Date field and „last change“ show 2 hour different times
- [TDCLIENT-813] - Wrong Data in History details view
- [TDCLIENT-820] - The space status is displayed as an untranslated string in mobile apps
- [TDCLIENT-827] - Deleting a space while uploading leaves the history events incomplete
- [TDCLIENT-833] - Content of SpaceInspector (SideWindow) does not resize/layout correctly
- [TDCLIENT-846] - Prevent depot data change message to break existing spaces
- [TDCLIENT-853] - Copying file from space with read-only rights doesn't work
- [TDCLIENT-856] - Publish file will not send P1MD5Check
- [TDCLIENT-860] - wrong publish email encoding
- [TDCLIENT-861] - Wrong owner displayed for company depots
- [TDCLIENT-862] - Case sensitive path lookup/check must be done for the whole path up to the root
- [TDCLIENT-868] - Archiving a space doesn't reset the archive manager's cache values.

Improvement

- [TDCLIENT-434] - Implement History-Filter for UserEvents (Join, Invite, Leave, Kick)
- [TDCLIENT-569] - Restore from backup not working
- [TDCLIENT-589] - Mac installer does not close the running TeamDrive application before or during update
- [TDCLIENT-660] - Could we display the Space creation date in the advanced space information?
- [TDCLIENT-712] - Limit/correct the permissions on Linux/Mac and double check against the filesystem like it's done the timestamps on Windows
- [TDCLIENT-741] - Ask user which spaces to import when importing from backup
- [TDCLIENT-754] - Remove CFileModelItemBase::FilterSpaces
- [TDCLIENT-819] - Some chars do not make it from the comment to mail.
- [TDCLIENT-823] - Check if file versions could be copied from backup space in fs before triggering a download when rejoining/recovering a space
- [TDCLIENT-825] - Configure default user right for invitations
- [TDCLIENT-830] - Add space creator to tbl_space, include in invitation, backup and CDialogImportBackups
- [TDCLIENT-839] - missing language choose combobox in the login dialog
- [TDCLIENT-854] - Double clicking on space in „Members“ tab should select the space in treeview
- [TDCLIENT-869] - Check and correct invalid or too long paths and update the flags in db

New Feature

- [TDCLIENT-772] - Propergate watcher errors up to the UI
- [TDCLIENT-817] - Add a system parameter „allow-store-forward-invitations“ which can be used to disable store and forward invitations
- [TDCLIENT-831] - Show all comments of all versions in one list.
- [TDCLIENT-867] - Add CSetCurrentFileVersionEvent to history
